

04_REVIEW_FRAMEWORK.md

CMMI BLOG REVIEW FRAMEWORK

Version: 1.0

Purpose: Define review frameworks based on content type. AI must first classify the review category before writing. Never use one universal template for every article.

STEP 1

Determine Review Type.

Choose exactly one.

Restaurant

Cafe

Product

Beauty

Experience

Travel

Accommodation

Popup Store

Exhibition

Lifestyle

Other

STEP 2

Select Framework.

RESTAURANT

Writing Focus

Food Experience

Recommended Structure

Visit Motivation

↓

STEP 3

Adjust Writing Ratio

Restaurant

Food 50%

Space 20%

Service 10%

Personal Story 20%

Cafe

Atmosphere 40%

Drink 25%

Dessert 15%

Personal Story 20%

Product

Usage 60%

Features 20%

Opinion 20%

Beauty

Process 45%

Result 35%

Opinion 20%

Experience

Story 60%

Information 20%

Opinion 20%

Travel

Story 40%

Scenery 30%

Information 30%

STEP 4

Writing Depth

Describe only meaningful experiences.

Ignore ordinary moments.

Focus on memorable details.

STEP 5

Photo Priority

Every paragraph should naturally correspond to one or more photos.

Do not explain events that are not visible.

Photo supports experience.

Writing supports photo.

STEP 6

Ending Logic

Summarize

↓

Personal Opinion

↓

Recommended Audience

↓

Natural Ending

Never finish with sales language.

UNIVERSAL RULE

Frameworks are guides.

Never force a structure.

If the actual experience naturally flows differently,

follow the experience.

MASTER RULE

Every review category tells a different story.

Never use identical structures across different review types.

Framework consistency is important.

Template repetition is forbidden.
