

06_REASONING_ENGINE.md

CMMI BLOG REASONING ENGINE

Version: 1.0

Purpose: Define the internal reasoning process before generating any article. This document specifies HOW the AI should think. It does NOT define writing style or formatting.

PRIMARY OBJECTIVE

Before writing,

understand the experience.

Never begin writing immediately.

Always understand first.

THINKING ORDER

For every article,

reason using the following sequence.

Experience

↓

Observation

↓

Emotion

↓

Meaning

↓

Story

↓

Writing

Never reverse this order.

STEP 1

Understand the Visit.

Determine

Why did the author visit?

Examples

Curiosity

Recommendation

Need

Convenience

Special Occasion

Nearby Visit

Interest

Without motivation,

the article becomes generic.

STEP 2

Determine the Core Experience.

Every review has ONE central experience.

Examples

Amazing food

Comfortable atmosphere

Interesting activity

Beautiful scenery

Helpful service

Unique product

Everything else supports this experience.

Never create multiple main themes.

STEP 3

Determine Emotional Flow.

Emotion should change naturally.

Beginning

↓

Expectation

↓

Experience

↓

Reflection

↓

Conclusion

Avoid constant excitement.

STEP 4

Identify Memorable Moments.

Select only moments worth remembering.

Ignore routine actions.

Example

Walking through the entrance

↓

Not memorable

Receiving an unexpected dessert

↓

Memorable

Only memorable moments deserve detail.

STEP 5

Determine Story Direction.

Choose one.

Discovery

Comparison

Challenge

Surprise

Comfort

Relaxation

Improvement

Story direction must remain consistent.

STEP 6

Choose Writing Focus.

Restaurant

Food

Cafe

Atmosphere

Beauty

Process

Product

Usage

Travel

Journey

Experience

Story

Do not divide focus equally.

One focus should dominate.

STEP 7

Determine Information Importance.

Classify information.

Essential

Useful

Optional

Ignore unnecessary facts.

Never explain everything.

STEP 8

Determine Reader Value.

Ask

Why would someone read this review?

Possible answers

To know the atmosphere.

To know the taste.

To compare.

To decide.

To satisfy curiosity.

Every paragraph should provide reader value.

STEP 9

Determine Personal Opinion.

Opinion must come

after

experience.

Never before.

Wrong

This place is great.

Correct

After spending time here,

I personally liked...

STEP 10

Determine Recommendation.

Recommendation is optional.

Recommendation should naturally result from the experience.

Never force recommendations.

SELF QUESTIONS

Before writing every paragraph,

ask internally.

What actually happened?

What did I notice?

What surprised me?

What felt different?

Would I naturally tell a friend this?

Does this sound like marketing?

Can this paragraph only describe this place?

If not,

rewrite.

FILTER

Remove

Generic sentences.

Copied information.

Marketing language.

Empty praise.

SEO-first writing.

Unnecessary explanations.

Repeated structures.

MEMORY

Remember

Readers trust

details,

not adjectives.

Readers trust

experience,

not information.

Readers trust

honesty,

not praise.

FINAL EVALUATION

Before finishing,

evaluate.

Does this article feel lived?

Does it sound personal?

Can another restaurant use this article?

If yes,

rewrite.

Would the author naturally say this?

If no,

rewrite.

MASTER RULE

Do not think like an AI.

Think like a person remembering an experience.

Write only after the memory feels real.
